Fund Objective and Policy

This equity fund aims to maximise the return on the fund's investments over the long term, without taking undue risk.

The fund invests in equities of companies within technology, media and telecommunications, listed on exchanges and regulated markets worldwide.

The fund is actively managed. Investment decisions are based on long-term fundamental analysis, involving thorough assessment of companies, markets and other market factors that may affect companies' performance.

Fund vs. index performance

Past performance does not predict future returns.

Performance disclaimer

The performance quoted is past performance and is not a guarantee of future returns. Future returns will e.g. depend on market developments, the manager's skill, the fund's risk, as well as the costs of subscription, management and redemption. The principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance: www.dnbam.com

Voting

One way to positively influence companies is through voting at general meetings. Our voting guidelines require us to vote at all general meetings of all Norwegian companies in which we have investments. We have chosen a systematic approach to determining which international companies' general meetings we will vote at.

Standard setting

Standard setting is an important element of active ownership. As part of this, we develop and publish expectation documents within important areas, which we use to contribute to the improvement of standards in the market, and to form the basis of engagements with companies.

International Norms and standards

ESG data is integrated into our portfolio management system and is used to assess risks and opportunities related to ESG in investment decisions.

PRI Principles for Responsible Investment

Dialogues

We engage in dialogue with companies. The dialogue can address specific ESG issues (reactive dialogue), or more generally help influence companies in a more sustainable direction (proactive dialogue).

The detailed Responsible Investment Policy and the Corporate Exclusion List are available at: https://dnbam.com/en/responsible-investments/esg-overview-dnb-funds

MSCI ESG Research Ltd

Although DNB Asset Management's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the 'ESG Parties'), obtain information (the 'Information') from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for your internal use, may not be reproduced or redisseminated in any form and may not be used as a basis for, or a component of any financial instruments or products or indices. Further, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

The decision to invest in the sub-fund should consider all the characteristics as described in the Prospectus and Key Information Document (KID). The documents are available on www.dnbam.com under section "Our funds", DNB Asset Management AS at Dronning Eufemias gate 30, 0021 Oslo Norway, or the management company FundPartner Solutions (Europe) S.A at 15, avenue John F. Kennedy, L-1855 Luxembourg.

Risk considerations (Generally speaking, every investment presents a risk of loss of capital.)

Company risk
The risk that something will happen to one or more companies in which the fund have invested causing those investments to lose value

Concentration risk
The risk that a negative event or shift in a particular sector or geography to which the fund s investments are exposed causing those investments to lose value

Systematic risk
The risk that e.g. an economic shocks or political instability in the market in which the fund invests causing all of the fund s investments to lose value

Liquidity risk
The risk that one or more of the funds investments could become hard to value, or to sell at a desired time and price

Currency risk
The risk that a negative change in a currency to which the fund is exposed causing these currency denominated investments to lose value

Further investment risks are set out in the risk warnings chapter in the prospectus.

Glossary

Alpha
Alpha shows the percentage performance of a fund above or below that explained by its exposure to the broader market.

Beta
Beta shows the average extent a fund's return moves relative to the broader market. A fund with a beta above 1 moves on average more than the market and below 1 moves on average less than the market.

Cut-off
Deadline for remittance of orders to the transfer agent in Luxembourg as set out in the relevant annexes to the prospectus. You may be required to submit your orders to your financial advisor or fund distributor by an earlier cut-off time.

Correlation and annualised volatility
Correlation shows how a fund's return moves in relation to the benchmark. Highly correlated investments tend to move up and down together while this is not true for investments with low correlation. Standard deviation or annualised volatility is a measure of historical volatility. It is calculated by comparing the average return with the average variance from that return.

Inception date
The inception date is the date taken into account for the start of performance calculation. On the launch date, all assets were transferred to the current sub-fund in exchange for shares of the current sub-fund.

Maximum drawdown
The largest loss measured from peak to trough until a new peak is attained.

NAV
An acronym of net asset value.

Ongoing charges (OCR)
Ongoing charges are based over 12 months of expenses ending the 31 December of the previous year. It is annually updated, but may be adjusted more frequently.

Sharpe ratio
The Sharpe ratio shows the fund's risk-adjusted performance. It is calculated by dividing the excess return (portfolio return minus risk free return) by the volatility.

SRI
The Summary Risk Indicator is a guide to the level of risk of this product compared to other products. The risk of the product may be significantly higher if held for less than the recommended holding period.

Standard deviation
Standard deviation or annualised volatility is a measure of historical volatility. It is calculated by comparing the average return with the average variance from that return.

Swing pricing
Swing pricing is an anti-dilution technique which protects long term investors from the direct and indirect costs of capital activities in the fund. The long-term performance of the fund is maintained with this solution.

Tracking error
The volatility of the fund's excess returns over its benchmark returns. It quantifies how closely a manager's return pattern follows that of the benchmark.

Important information

This document constitutes a marketing communication. Investors should read the **prospectus, Key Information Document (KID), semiannual and annual reports**, and **summary of investor rights** before making any investment decision. English versions are available at www.dnbam.com under "Our Funds", at **DNB Asset Management AS**, Dronning Eufemias gate 30, 0021 Oslo, Norway, or at the management company **FundPartner Solutions (Europe) S.A.**, 15, avenue John F. Kennedy, L-1855 Luxembourg. Local language versions may also be available.
