COMMENT BY PORTFOLIO MANAGERS

Dear investor,

Storm Bond Fund posted a positive return of +0.1% in October and is up +4.8% YTD (institutional IC NOK share class: LU0840158496).

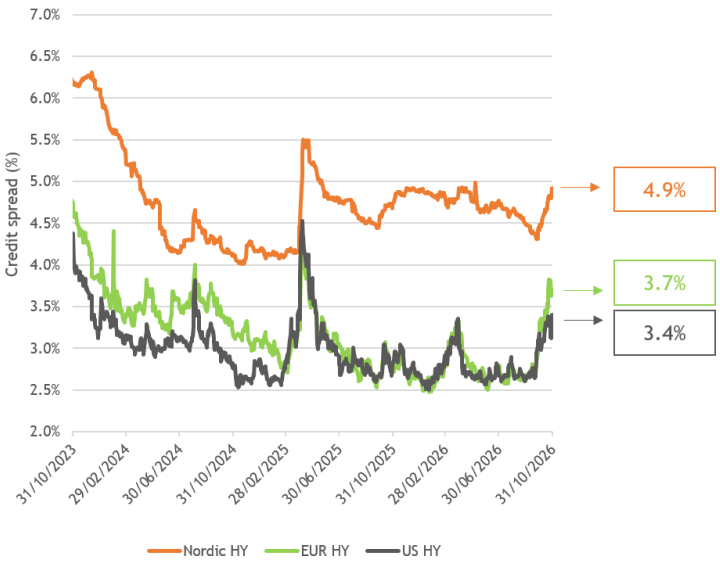

October was a mixed month for risk assets, marked by a sharp rotation away from AI-related technology stocks and a recovery in government bonds following September's sell-off. Growing concerns over the scale and return of AI infrastructure investments, alongside rising energy prices and renewed fiscal uncertainty in France, weighed on risk sentiment. Both the FED and ECB kept policy rates unchanged, while the US 10Y Treasury yield declined 36bp to 4.9% and German 10Y yield fell 26bps to 3.3%. Large cap tech underperformed with Nasdaq down -5.3%, while S&P fell -0.9% and Stoxx 600 gained +1.9%. Corporate credit remained under pressure, with US and European HY spreads widening by 29bps and 65bps, respectively. However, lower government bond yields provided some support, leaving US HY up +0.3%, while European HY declined -1.1% during the month (source: Bloomberg, as of 30/10/2026).

Storm Bond Fund returned +0.1% in October, with performance primarily driven by attractive coupon carry and re-pricing of Trustly, partly offset by some general credit spread widening in line with international markets. With a credit duration of approximately 2 years, the fund's sensitivity to changes in credit spreads remains relatively limited. Primary market activity in Nordic high yield remained healthy, with EUR 1.9bn in new issuance during October.

We took advantage of the slightly softer market sentiment to increase our exposure to several high-conviction positions, including Golar, Odfjell Drilling, International Seaways, YIT and Ithaca.

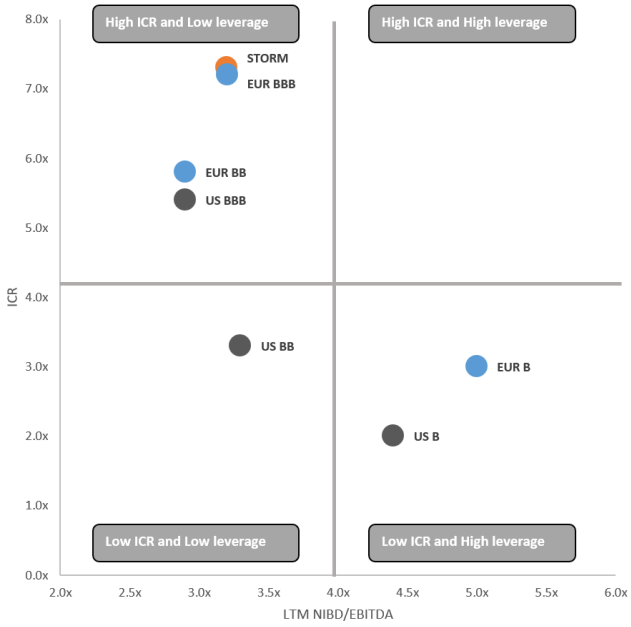

We apply a disciplined, bottom-up credit selection process underpinned by a detailed fundamental analysis coupled with robust risk management. We focus on HY-issuers with strong asset backing, solid balance sheets, and proven debt-servicing capacity - resulting in a high-quality, sector-diversified portfolio dominated by resilient Nordic credits that can withstand shifts in inflation and interest-rate expectations. The portfolio currently delivers a 7.7% NOK yield, including ~10% cash, while maintaining limited spread and rate sensitivity with a short credit duration of 2.2 years and modified duration of 1.2 year. We view the current risk/reward profile as attractive, with weighted-average credit metrics consistent with BB/BBB quality. Moreover, our prudent liquidity management - typically maintaining a 5–10% cash buffer - enabling us to mitigate short-term market volatility and seize compelling investment opportunities as they arise.

With over 90 years of operational history, Nynas is a leading Nordic bitumen producer . Its products typically account for just 3-7% of customers' total costs, making quality and reliability more critical than price - resulting in high customer stickiness and strong margins. The bond is secured, and has already de-levered to 2.9x post-refinancing. The risk/reward profile appears attractive based on current metrics.

The refinancing materially strengthens the balance sheet, reducing gross leverage to approximately 1.5x and adding $500 million of new equity from existing shareholders. The bond is secured by a first-priority lien over substantially all group assets, offering an attractive risk/reward profile supported by a de-risked business and significantly improved credit metrics.

In May, Apollo and Rettig announced a public cash tender offer for all outstanding shares, valuing the company's equity at EUR 465m and its enterprise value at approximately EUR 800m . As part of the acquisition, Purmo issued a EUR 380 million senior secured bond maturing in 2029. We deem bonds yielding more than 12% to offer solid value with the credit profile being supported by its attractive market position, solid debt service and strong implied asset backing.

The company owns a fleet of 23 vessels making them the largest seismic operator in the world. We deem the credit story attractive due to 1) multi-client cash flow offsetting weak contract market, 2) leverage at 5.3x with deleveraging path via term-loan amortisation and 3) strong market position in a consolidated seismic vessel market.
Navios Maritime 25-30	NO0013685115	101.0	8.3%	1.2%	Navios Maritime is a scaled, diversified shipping owner with a modern fleet of ~170 vessels across dry bulk, containerships, and tankers, with an average age of ~9.6 years. The company benefits from cost flexibility, driven by its control of ~97% of its 2P reserves . EnQuest's credit profile is supported by low leverage, robust debt service capacity, strong FCF generation and deleveraging capabilities. Additionally, its carry-forward tax losses mitigate the impact of windfall taxes, positioning the company advantageously for accretive M&A opportunities on the UK continental shelf and Southeast Asia.
International Seaways 25-30	NO0013660365	100.3	7.8%	1.1%	International Seaways is a leading owner and operator of crude and product tankers, recognized as one of the most conservatively managed names in the global tanker space. The company is listed on the New York Stock Exchange with a market capitalization of approximately USD 4.9 bn.
Odfjell Drilling 25-31	NO0013698159	100.5	8.0%	1.1%	Odfjell Drilling is a leading provider of energy services in the North Sea and is listed on Oslo Stock Exchange with a mcap of ~NOK 26.1bn. The credit benefits from a strong collateral package comprised of two high spec rigs under long term contracts with Equinor. Further, the current EBITDA backlog of the collateral rigs covers the bond by more than 100%, resulting in strong cash flow visibility and debt service capabilities. We estimate 60% LTV at issuance, which will decline towards 35% at maturity through scheduled amortization. This combined with a strong ownership base, long track-record, ESG focus and strong outlook, is deemed to make the credit story attractive.

The EUR 239m 6Y senior secured bonds were issued at +650bps with strong bond support from low operating leverage (1.6x), robust FCF generation (10% FCF/GIBD 2026e), and strict documentation. Despite sector softness and carve-out risks, the conservative SOTY LTV of <60% helps to mitigate downside risk based on a heavily discounted peer valuation. Further, there is upside to valuation if the carve-out unlocks value through operational focus and multiple re-rating.
Attica Exploration AS 26-31	NO0013757443	98.6	12.1%	0.9%	Attica Exploration is an independent exploration and production company focused exclusively on the Norwegian Continental Shelf, with a diversified portfolio of producing and development assets operated by Tier-1 companies including Aker BP and Vår Energi. Backed by the Lundin family and a management team with over 20 years of successful value creation, the company is well positioned to deliver strong production growth from a portfolio of low-cost, low-risk subsea developments. The bond is senior secured, while the company has recently strengthened its balance sheet through a USD 80 million equity raise and is expected to deleverage to approximately 0.5x over the life of the bond. The overall risk/reward profile appears attractive based on the company's high-quality asset base, conservative leverage and strong sponsorship.
Oslo Kommune 26-28	NO0013771196	99.9	5.3%	0.8%	Oslo Kommune is Norway's capital and largest municipality, with a broad tax base and a long track record as a frequent bond issuer.
